Brendan May

Oregon State University | Corvallis, Oregon

SUMMARY

Data Science student at Oregon State University interested in data analysis, statistics, and how data can be used in areas like healthcare, environmental science, and astronomy. I bring a strong interest in math and problem solving, and I am working on building my skills in statistics, programming, and explaining results clearly.

EDUCATION

Oregon State University | Corvallis, Oregon

Bachelor's degree in Data Science | Expected graduation: 2028

Relevant coursework: Mathematical Statistics, Linear Algebra, Calculus II, Physics with Calculus, and Statics

EXPERIENCE

Statistics Coursework and Data Analysis | Oregon State University | 2026–Present

- Worked through probability and statistics problems involving expected values, variance, and interpreting statistical results.
- Practiced explaining what statistical results mean instead of only focusing on calculations.
- Used R and statistical software for coursework and data analysis practice.

Group Model Rocket Project | School project

- Worked with a group to build a model rocket and contribute to the planning and construction process.
- Coordinated with group members to complete project tasks and put the finished model together.
- Used problem solving, teamwork, and attention to detail while working on a hands-on project.

Boxing and Martial Arts Training | Ongoing extracurricular activity

- Maintain a consistent training schedule while balancing school and other responsibilities.
- Work with coaches and training partners, using feedback to improve technique and performance.
- Build discipline, teamwork, and focus by working toward long-term goals.

SKILLS

Technical: R (basic coursework use), statistics and probability, data interpretation, linear algebra, Microsoft Office

Transferable: analytical thinking, problem solving, attention to detail, communication, teamwork, time management
